

Daniel Charlie Samuel Siburian

Batam, Riau Islands | [081374994587] | [danielces1120@gmail.com] | [https://www.linkedin.com/in/daniel-charlie-samuel-siburian-1a9a162a3/]

PROFILE

Software Engineering student at Batam State Polytechnic (Polibatam) with extensive hands-on experience in Web and Mobile Application Development. Proven track record in full-stack engineering, from requirements gathering and system design (UML) to UI/UX design (Figma) and implementation. Proficient in various frameworks including Laravel and Tailwind CSS. Strong analytical, technical, and collaborative skills.

Batam State Polytechnic (Polibatam)	Batam, Indonesia
<i>Software Engineering Technology Study Program (TRPL) Students</i>	<i>2023 – Present</i>
• Academic Status: Active student in Semester 6 with a focus on enterprise-scale software engineering. • Study Focus & Competencies: Web Application Development, Project Management (Agile/Scrum), System Design Object Oriented Modeling (UML), as well as User Interface Design (UI/UX).	

ACADEMIC PROJECTS & SYSTEM DEVELOPMENT

Personal Financial Management System (MoneyMate)	[2025-present]
<i>Full-Stack Developer & System Analyst</i>	<i>Academic Projects</i>
• Designing web architecture from the initiation stage, gathering requirements, to implementation using the Prototyping method. • Develop backend systems using the Laravel framework and integrate it with Firebase as a dynamic data storage solution. • Implemented a responsive and modern web interface using Tailwind CSS based on a highfidelity prototype validated in Figma. • Implement UML-based system modeling (Use Case, Class, and Sequence Diagram) and actively collaborate in teams using Agile/Scrum work methodologies.	

RambULD Application (IOT-Based Traffic Sign Recognition Application)	[2025]
(Lead Developer In IoT)	
• Developing real-time traffic sign recognition using technology to increase user engagement in digital education platforms and eata on Raspberry PC. • Customized Raspberry Pi Linux-based OS anti-nanal using YOLOv8 on Raspberry Pi. • Optimizing model inference for air edge devices, model conversion to model conversion to TensorRT/ONNX. Integratiding camera and eskamuck mekanisme and menginmnate mekanisme and feedback. • Developed custom libraries for data phutasa puskuus senso and antarmyrka device	

Web-Based Interactive Learning Media Application	[2024]
<i>Developer & Researcher</i>	<i>Research project</i>

- Conduct in-depth literature studies on gamification methodologies to increase user engagement in digital education platforms.
- Design and develop interactive quiz features and web-based reward mechanisms to create an immersive and structured learning experience.

istore website selling smartphones

Batam, Indonesia

Front end developer

2024

- Manage the entire interface (UI) development cycle, starting from analysis of design requirements to *prototype*, cross-device testing (*Quality Control*), up to the final implementation stage.
- Independently design and execute responsive *frontend* architectures to improve user accessibility, resulting in seamless and optimal web interactions.
- Build solid collaboration with *backend* teams and designers through effective technical communication, as well as performing maintenance to ensure application performance and end-user satisfaction.

SKILLS & CERTIFICATION

Programming Languages: PHP, Laravel, Node.js, Dart, JavaScript, Tailwind CSS, HTML5, CSS3 ,

Mobile Development: Android Studio

Framework: Laravel Express.js, PHP Native, REST API Development, Flutter

Methodology & Competencies: Agile & Scrum, System Analysis (UML), Prototyping, Retail Business Management

IoT Development: ESP8266, MQTT

Databases: MySQL, PostgreSQL Firebase

Tools & Technologies: Git, GitHub, Postman, Figma, VScode, Composer, Laragon
